

SECURELY CONNECTING HEALTHCARE PROVIDERS

Healthcare professionals need a reliable data transport that incorporates disaster recovery and is cost-efficient, compliant and scalable.

Leveraging SENFUSE, powered by etherFAX, Exucom created an alternative to traditional fax lines that supports all major fax servers. The secure transport of all incoming and outgoing faxes also provides a direct/encrypted connection to other healthcare institutions/providers on the network.

SENFUSE provides a private fax network in the cloud. Designed specifically for the healthcare ecosystem, it offers guaranteed secure delivery and preferred transaction rates for in-network faxing. By joining the SENFUSE network organizations automatically gain access to six million nationwide endpoints. Most importantly, it provides the capability to build a private health exchange using technology that is implemented in every healthcare organization across the nation.

SECURITY AND COMPLIANCE

Security is a clear differentiator, as SENFUSE incorporates multi-level encryption security known as a “defense-in-depth” approach which is a layering tactic, conceived by the NSA. In addition, all fax transactions are processed in a secure and encrypted database utilizing the same standards.

- ✓ HIPAA Compliant
- ✓ PCI Certified

BUILD YOUR OWN NETWORK

SENFUSE provides preferred rates for in-network faxing. All faxes exchanged within the SENFUSE network are securely delivered at a reduced rate. Building your own network starts with these four easy steps:

1. Free Assessment
2. Join
3. Review
4. Contact

MULTIPLE ENDPOINT INTEGRATIONS

SENFUSE provides multiple endpoint options, supporting a broad range of fax needs. No organizations is too big or small to join the network. SENFUSE can integrate with the following:

Fax Server: currently supports all major fax server applications.

API: a number of “jump-start” kits for REST, PHP, C#, Linux, Java, and .NET class libraries that make integration painless and simple.

Multi-Function Devices/Fax Servers: Leverage Multi-Tech’s cloud connector to link fax machines and multi-function devices.

QUICK FACTS

Established 2001

Ownership Private; SENFUSE is owned and operated by Exucom Systems Inc.
